

1

You are ready to grow your business

The Next generation DMS offers even more benefits and value to help your dealership grow. By taking advantage of improved functionality, new features, and powerful capabilities, you can drive sales, reduce costs, and improve customer service.

2

Keep up and remain competitive

The automotive retail arena is changing. This solution will allow you to rapidly and successfully respond to evolving industry and customer expectations. incadea.myengine includes key functionalities that are in line with the latest market trends, enabling you to remain competitive.

3

Learn more from Best Practices

The Solution incorporates industry know-how gathered from interactions with more than 80,000 end users, across 3,500 dealerships, in 90 countries. incadea.myengine is the result of working closely with industry experts, collaborating with thousands of automotive employees, and utilizing the technological expertise of Microsoft.

4

Improve employee productivity and efficiency

incadea.myengine offers customized work world experience through the new role – tailored client (RTC). Each role in your dealership has its own optimized working environment. Explore more than 20 automotive dealership roles across Service, Parts, Vehicles, Customer Relationship, Finance and Controlling, Human Resources, and IT departments.

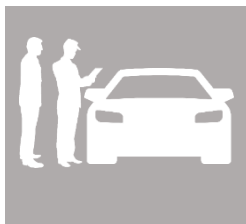

5

Become customer centric

Offer an exceptional cross-departmental experience that builds loyalty and increases revenue. Better user information enables you to inform and serve customers in a timely manner. At the heart of incadea.myengine is the relationship management – a CRM tool within your DMS.

6

Go mobile. Spend more time with your customer and their Vehicle

The next generation DMS solution offers seamless integration between incadea mobile apps (incadea.mysales and incadea.myservice), revolutionizing the way you interact with your customers.

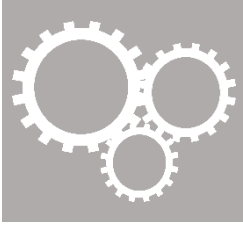

7

Increase your intelligence

incadea.myengine includes an advanced set of analytics and reporting tools that eases the way you monitor and analyze real time KPIs and business data. A BI solution in your DMS.

8

Maximize your investment in Microsoft Products

incadea.myengine introduces a new technology platform powered by Microsoft Dynamics NAV 2013. Upgrading your solution with the latest technological and infrastructural advances ensures its smooth operation, empowering you to maximize your existing investments in other Microsoft products and services.

9

Cloud Ready?

incadea.myengine is cloud enabled, allowing you to minimize hardware and IT management costs, with highly efficient automated processes. Securely access business data in the cloud anytime, anywhere.

10

Easier to use. Reduce training efforts

incadea.myengine interacts seamlessly with other Microsoft technologies you may already use, such as Office and SharePoint. This simplified user experience, designed for every specific job function/role, significantly reduces training efforts.
